

PHARMACY & INFORMATICS

Science meets *Artistry*

Blending clinical precision with creative insight. Merging the analytical world of **Pharmacy** with the innovative realm of **Informatics**.

The Observer

I am a methodical and research-oriented **Bachelor of Pharmacy** undergraduate with a grounded understanding of core pharmaceutical subjects and scientific communication.

My journey is defined by a dual passion: the rigorous, evidence-based approach of clinical research and the expansive, interpretative nature of informatics and writing. I thrive in environments that require deep critical thinking, keen observation, and the ability to translate complex technical material into clear, impactful insights.
